WAREHOUSE/FULFILLMENT & ONLINE PRINT PROCUREMENT

Dumont's warehouse management services include storage of all static and shell based items, pick and pack and kitting services. In addition, Dumont's warehousing services offers the following features:

Dumont's PrinterSite Fulfillment solution is a state-of-the-art web-based tool that meets many requirements of companies looking to streamline their print purchasing habits by improving efficiencies throughout the print procurement process. PrinterSite Fulfillment is fully integrated with Dumont's MIS system, allowing for the real-time update and display of inventory counts online, real-time order status updates, as well as efficiencies in reordering and invoicing. This solution is provided in partnership with a world leader in the development of print procurement and print management tools, EFI (Electronics for Imaging Inc.). With over 100 installations worldwide, our PrinterSite Fulfillment product is a mature and proven online print procurement solution. Our flexible system can be used for inventory items; imprint items as well as repeat orders, digitally printed items and uses a standard shopping cart system.

Our capabilities are great, and our sales staff is customer-driven, service-oriented marketers. Our promise to our clients is to give our best effort to provide the high level of service necessary to make these capabilities effective for you.
